Professional Experience

Independent, Leiria, Portugal
IT Consultant

2023 – Present

Spearhead diverse projects ranging from website creation and maintenance to Excel training and VBA macro creation. Lead comprehensive reviews, documenting requirements, and organizing tasks and timelines. Manage reviews and updates of outdated modules, enhancing user experience, fixing bugs, and optimizing website functionalities.

- **Social Media Network Startup - Project Manager:** Orchestrated project timelines and budgets, optimizing resource allocation and identifying risks to ensure on-time and within-budget delivery. Organized project tasks and timelines into a cohesive plan. Plan for a strategic technology review.
 - Directed and coordinated system analyses, reviews, and assessments of initial project achievements.
 - Successfully documented updated project requirements, ensuring alignment with evolving goals for seamless project continuation.
- **Website Creation & Maintenance - IT Consultant:** Engaged in proactive problem-solving, diagnosing and resolving technical issues swiftly. Collaborated with stakeholders to formulate strategic IT plans, aligning with business objectives. Reviewed and updated outdated modules to enhance user experience. Delivered insightful recommendations for process enhancements, fostering continuous improvement.
 - Modernized website functionalities to enhance user experience.
 - Corrected bugs and fixed broken links.
 - Optimized images and integrated booking software.

McCain Foods Limited, New Brunswick, Canada
Product Owner/Senior Business Analyst/Project Manager

2016 – 2023

Managed end-to-end project management, business analysis, and product ownership tasks. Identified process improvements, requirements gathering, analysis and documentation, led validation activities. Trained and supervised development teams and budgets, coordinated releases, and provided ongoing support. Created advanced Excel programs to automate manual processes and ensure efficient operations.

- **Digital Agriculture Data Modernization - Business Analyst/Project Manager:** Led migration of legacy data warehouse to Azure Cloud, enhancing data accessibility and reporting capabilities. Drove modernization of data pipelines using Informatica Cloud, enabling self-service analytics. Managed project deliverables, including scope, timelines, and budget, ensuring alignment with goals. Facilitated Agile/Scrum sessions as Product Owner, fostering a collaborative development environment.
 - Exceeded KPI targets by 160% for fiscal year, demonstrating exceptional project delivery.
 - Negotiated with third-party partners for optimal resource allocation and cost efficiency.
 - Pioneered the introduction of self-service reporting tools, empowering end-users with direct data insights.

- **Mobile App Revitalization for Digital Agriculture - Product Owner/Business Analyst:** Managed full lifecycle of a mobile app revitalization project for digital agriculture sector, including migration and update of an MVP application. Directed development team, ensuring seamless integration of a new data model and implementation of Agile methodologies. Coordinated release schedules, monitored project timelines, and maintained budgets.
 - Oversaw enhancement of reporting capabilities in Power BI, addressing 95% of project backlog items.
 - Onboarded a new third-party development team, resulting in 25% cost savings for the year compared to our original partner.
- **Global Procurement Application Quality Assurance - Project Manager:** Oversaw COUPA implementation testing across North American operations, including SAP integrations. Streamlined testing processes by organizing scripts and leveraging HP ALM to enhance testing structure. Oversaw test planning, resource allocation, progress tracking, and issue resolution, ensuring project milestones were met within Waterfall methodology framework.
 - Led a 30-person testing team, adhering strictly to project timelines and delivering quality assurance.
 - Enhanced efficiency of audit processes by creating advanced Excel-based reports.
- **Integrated Supply Chain Finance Reporting Automation - Project Manager:** Headed a 5-day stakeholder workshop to define project requirements and secure funding for automation of key financial reports. Supervised development team, overseeing creation and implementation of automated solutions for month-end reporting.
 - Directed requirement analysis, documentation, and communicated with subject matter experts to ensure accurate translation of business needs into technical specifications.
 - Orchestrated unit and user testing phases to validate functionality and performance.
 - Automated 15 month-end reports, streamlining reporting process and saving 30 person-hours per month.
- **Food Service, Category Management/Insights - Senior Business Analyst:** Directed data analysis and category insights for SYSCO Food Service Distributor. Maintained and supported MicroStrategy reporting, ensuring prompt fulfillment of ad-hoc data requests and consistent data quality.
 - Established FTP integrations for database updates and led web application's development cycle from testing to user training.
 - Created and integrated a new data warehouse, enhancing data-driven decision-making and automating report generation for management.
 - Instrumental in winning the trial award for the French Fry Category, followed by full awards for both Potato and Pizza categories, through strategic analysis and insights.
 - Achieved "Best Partner" recognition by SYSCO and McDonald's Restaurants, validating the effectiveness of analytical approaches and collaborative efforts.
- **North American Payroll Software Implementation - Senior Business Analyst:** Implemented UKG payroll processing system, enhancing payroll management. Orchestrated development of robust integration processes between SAP HR and payroll systems, facilitating accurate HR data and General Ledger entries.
 - Developed and integrated new interfaces for seamless employee data and General Ledger transactions.
 - Migrated payroll and time-off balances from legacy systems, maintaining data integrity for reporting.
 - Successfully implemented a Payroll Software for approximately 10,000 employees, resulting in a 15% reduction in software and operating costs annually.
